

Project Title:

Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau

Team ID: LTVIP2026TMIDS89796

Project Design Phase-I

Solution Fit

1. CUSTOMER SEGMENT(S) Who is your customer? Students, researchers, heritage enthusiasts, data analysts, and general users interested in UNESCO World Heritage insights.	6. CUSTOMER CONSTRAINTS What constraints prevent your customers from taking action or limit their choices of solutions? Limited technical knowledge, difficulty interpreting complex datasets, lack of unified platforms, and time-consuming manual analysis	5. AVAILABLE SOLUTIONS Which solutions are available to the customers when they face the problem or need to get the job done? What have they tried in the past? What pros & cons do these solutions have? Static reports, spreadsheets, and multiple websites provide information but lack interactive visualization and centralized analytics.
2. JOBS-TO-BE-DONE / PROBLEMS Which jobs-to-be-done (or problems) do you address for your customers? 1. Explore UNESCO heritage data through interactive dashboards, maps, and visual reports. <u>2. Understand</u> regional trends, categories, and danger site analysis easily. <u>3. Access</u> all heritage analytics from a single centralized web platform.	9. PROBLEM ROOT CAUSE What is the real reason that this problem exists? What is the back story behind the need to do this job? Heritage data exists in raw formats without structured visualization, and there is limited integration between data analytics and web applications.	7. BEHAVIOUR What does your customer do to address the problem and get the job done? Users search online resources, browse maps, and read reports, but struggle to extract insights quickly without visual tools.
3. TRIGGERS What triggers customers to act? Interest in global heritage awareness, academic research needs, curiosity about cultural sites, or requirement for visual learning tools.	10. YOUR SOLUTION A Flask-based web application integrated with Tableau dashboards that provides interactive maps, charts, and story-based analytics for UNESCO World Heritage Sites.	8. CHANNELS OF BEHAVIOUR 8.1. Online: Educational websites, Tableau dashboards, analytics platforms, research portals. 8.2. Offline: Academic presentations, printed reports, learning materials.

4. EMOTIONS: BEFORE / AFTER

How do customers feel when they face a problem or a job and afterwards?
Before: Confused, overwhelmed by raw datasets and scattered information.
After: Confident, informed, and engaged through interactive dashboards and storytelling.
