

Project Design Phase-I
Proposed Solution Template

Date	19 February 2026
Team ID	LTVIP2026TMIDS89796
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	2 Marks

Proposed Solution:

S.No.	Parameter	Description
1.	Problem Statement (Problem to be solved)	Users face difficulty understanding UNESCO World Heritage data due to scattered information and lack of interactive visualization platforms.
2.	Idea / Solution description	A Flask-based web application integrated with Tableau dashboards to provide interactive analytics, maps, and visual storytelling of UNESCO heritage sites.
3.	Novelty / Uniqueness	Combines data visualization, storytelling, and web integration into a single platform, making heritage analytics easy to explore and understand.
4.	Social Impact / Customer Satisfaction	Helps students, researchers, and general users learn about global heritage through clear visual insights, improving awareness and educational engagement.
5.	Business Model (Revenue Model)	Can be extended as an educational analytics platform with premium dashboards, institutional access, or data insights services.
6.	Scalability of the Solution	The Flask architecture allows easy deployment on cloud servers, and Tableau dashboards can scale with larger datasets and advanced analytics features.
