

Project Design Phase-II

Data Flow Diagram & User Stories

Date	19 February 2026
Team ID	LTVIP2026TMIDS89796
Project Name	Heritage Treasures: An In-Depth Analysis of UNESCO World Heritage Sites in Tableau
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) visually represents how data moves through the system. For the project UNESCO World Heritage Sites Analytics Using Tableau and Flask, the DFD includes the following components:

- External Entities: User, Researcher, Student, Administrator
- Processes: Data Collection, Tableau Visualization Development, Dashboard Analysis, Web Integration using Flask, Interactive Reporting
- Data Stores: UNESCO Heritage Dataset (Excel), Tableau Dashboards, Embedded Web Pages

Flow Summary:

1. UNESCO heritage dataset is collected → Data prepared and loaded into Tableau.
2. Tableau processes data → Dashboards and visual analytics are created.
3. Dashboards are published → Embed links generated for web integration.
4. Flask application loads dashboards → Users interact with visualizations and analyze insights.

User Stories:

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
User	Dashboard Access	USN-1	As a user, I can view UNESCO heritage dashboards through the website	Dashboards load correctly inside web page	High	Sprint-1
User	Data Visualization	USN-2	As a user, I can explore maps, charts, and analytics visually	Interactive charts respond to user actions	High	Sprint-1
Researcher	Data Analysis	USN-3	As a researcher, I can analyze heritage site trends by region and category	Filters and insights display accurate data	Medium	Sprint-2
Admin	Tableau Integration	USN-4	As an admin, I can embed Tableau dashboards into	Embedded dashboards display without	High	Sprint-2

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance Criteria	Priority	Release
			Flask pages	errors		
User	Story Navigation	USN-5	As a user, I can navigate between dashboards and story sections	Navigation buttons work smoothly	Medium	Sprint-3
Admin	Web Application Management	USN-6	As an admin, I can run and manage the Flask application locally	Flask server runs and loads templates	Medium	Sprint-3
User	Interactive Reporting	USN-7	As a user, I can interact with visual reports to gain insights	Hover, zoom, and filters work properly	Medium	Sprint-4
